LAR 2020-21 has arrived. This volume presents articles with a great variety of topics, ranging from the Stone Age to the Middle Ages, and discussing materials from both Scandinavia and South America. Three of the articles, by Kenth Hansen, Martin Hansson and Anders Ödman, was presented as papers at the 6th Conference on Towers in Medieval Europe - Towers of Strength, which was held August 23-25, 2019, at the Department of Archaeology and Ancient History, Lunds University. They will also be published in a forthcoming conference volume in the series Towers Studies, edited by Professor Richard Oram, University of Stirling.

Fredrik Ekengren & Martin Hansson
